

Srithin Chillamcharla

chillamcharlasrithin@gmail.com | +91 8106211729 | LinkedIn | Hyderabad, India

Education

Jawaharlal Nehru Technological University, Hyderabad, India
B.Tech. in Information Technology | CGPA: 8.37

Sep 2020 – May 2024

Experience

AI Agent Engineer, Emergent - Remote

Aug 2026 – Present

- Built and orchestrated **end to end AI workflows and automations** for customer problem resolution, integrating **LLMs and AI agents** to classify, prioritize, categorize, and route issues across support systems.
- Created and curated **customer issue datasets** from historical support tickets and complaints, improving data quality and evaluation coverage for **automated issue classification**.
- Implemented **RAG based knowledge retrieval** and **agent evaluation workflows** to ground AI responses in domain specific support knowledge and assess response accuracy and reliability.
- Worked as a **Forward Deployed Engineer** with **European clients**, translating business requirements into **AI powered fullstack applications**, designing workflows, integrating agents and APIs, and supporting end to end delivery.

Software Engineer, EPAM Systems - Hyderabad, India

Jun 2024 – July 2026

- Developed and maintained **fullstack** web applications using **React, TypeScript, Python, Django, and FastAPI**, delivering scalable features across enterprise business workflows.
- Designed **RESTful APIs** with Django REST Framework and FastAPI, integrating **PostgreSQL and MySQL** and optimizing database queries to reduce API response times by approximately **20%**.
- Built reusable **React components** with Redux and implemented real time communication using **WebSockets and Django Channels**, reducing feature development effort by **15%**.
- Developed unit and integration tests using **PyTest, Jest, and React Testing Library**, achieving **96% test coverage**; leveraged **AWS Lambda, S3, and CloudWatch** for backend integrations, storage, and monitoring.

Research Intern, Vardhaman College of Engineering - Hyderabad, India

Jun 2023 – Feb 2024

- Conducted research on **neural networks** and image processing algorithms for secure data hiding, achieving **95%** data retrieval accuracy.
- Designed and implemented a Python based encryption decryption algorithm using **TensorFlow, Keras, NumPy, and Pandas** for secure data transmission.

Projects

Multi Agent SDLC Automation | EPAM Codemie, Prompt Engineering, LLMs

- Built a **multi agent AI workflow** on **EPAM Codemie** to automate SDLC activities including requirements analysis, design, development, testing, and deployment, reducing manual handoffs and development cycle time by **35%**.
- Designed **agent orchestration, structured prompt chains, and tool integrations** enabling specialized agents to share context and execute dependent development tasks, reducing manual developer effort by **43%**.

Skills

AI & GenAI: AI Agents, LLMs, RAG, Agent Orchestration, LangChain, LangGraph, Prompt Engineering, AI Evaluation

Backend: Python, FastAPI, Django, REST APIs, WebSockets, PostgreSQL, MySQL, MongoDB

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Redux

Cloud & DevOps: AWS, Lambda, S3, CloudWatch, Git, Jenkins, CI/CD

Publications

An Image Hiding Strategy Based on Neural Networks

Jun 2024

OPJU International Technology Conference (OTCON) | **IEEE** 10.1109/OTCON60325.2024.10687749

Achievements & Certifications

- Performance Champion**, Q2 2025 Awards, EPAM Systems
- EPAM Certified** Generative AI & Agentic AI
- Salesforce Certified **AI Associate** (Verify)
- Claude Certified Architect**, Anthropic (Verify)
